# Volume 53 1975

## Table of Contents

1 Nomenclature of α-Amino Acids. Recommendations, 1974. IUPAG Commission on the Nomenclature of Organic Chemistry (CNOC) and IUPAC-IUB Commission on Biochemical Nomenclature (CBN)

15 Nomenclature of Quinones with Isoprenoid Side-Chains. Recommendations, 1973. IUPAG-IUB Commission on Biochemical Nomenclature (CBN)

19 Antibodies to *Micrococcus lysodeikticus:* Restricted Structural Heterogeneity in Hyperimmunized Rabbits
M. van Hoegaerden, M. Wikler, R. Janssens, and L. Kanarek

25 Structural Studies on the Combining Site of the Myeloma Protein MOPC 315
R. A. Dwek, J. C. A. Knott, D. Marsh, A. C. McLaughlin, E. M. Press, N. C. Price, and A. I. White

41 Biosynthesis of Nicotinamide Adenine Dinucleotide in Mitochondria
H. Grunicke, H. J. Keller, B. Puschendorf, and A. Benaguid

47 Bacterial-Cell-Wall Peptidoglycan Fragments Produced by Phage λ or Vi II Endolysin and Containing 1,6-Anhydro-*N*-acetylmuramic Acid
A. Taylor, B. C. Das, and J. van Heijenoort

55 The Mechanism of Enzymatic Cellulose Degradation. Characterization and Enzymatic Properties of a β-1,4-Glucan Cellobiohydrolase from *Trichoderma viride*
L. E. R. Berghem, L. G. Pettersson, and U.-B. Axiö-Fredriksson

63 7α-Hydroxylation of Exogenous and Endogenous Cholesterol in Rat-Liver Microsomes
I. Björkhem and H. Danielsson

71 Modification of Alcohol Dehydrogenases with a Reactive Coenzyme Analogue. Identification of Labelled Residues in the Horse-Liver and Yeast Enzymes after Treatment with Nicotinamide—5-Bromoacetyl-4-methyl-imidazole Dinucleotide
H. Jörnvall, C. Woenckhaus, and G. Johnscher

83 Isolation and Characterization of Highly Purified Globin Messenger RNA from Anaemic-Rabbit Spleen
P. Nokin, A. Burny, Y. Cleuter, G. Huez, G. Marbaix, and H. Chantrenne

91 Isolation and Properties of Prophospholipase $A_2$ from Ox and Sheep Pancreas
C. E. Dutilh, P. J. van Doren, F. E. A. M. Verheul, and G. H. de Haas

99 Formation of Superoxide in the Autoxidation of the Isolated α and β Chains of Human Hemoglobin and Its Involvement in Hemicrome Precipitation
M. Brunori, G. Falcioni, E. Fioretti, B. Giardina, and G. Rotilio

105 The Action of Chaotropic Anions on the Sarcoplasmic Calcium Pump
R. The and W. Hasselbach

115 Nucleotide Sequences of Rat-Liver Serine tRNA. Structure of Serine $tRNA_3$ and Partial Nucleotide Sequences of Serine $tRNA_{2a}$
H. Rogg, P. Müller, and M. Staehelin

129 Diffusion of Linear Polymers in Hyaluronate Solutions
T. C. Laurent, B. N. Preston, H. Pertoft, B. Gustafsson, and M. McCabe

137 Closed-Circular DNA from Mitochondrial-Enriched Fractions of Four *Petite*-Negative Yeasts
R. M. O'Connor, C. R. McArthur, and G. D. Clark-Walker

145 The Specificity of Antisera to Conjugates of Prostaglandins E with Bovine Serum Albumin and Thyroglobulin
A. Raz, M. Schwartzman, R. Kenig-Wakshal, and E. Perl

151 The Binding of Coenzymes and Analogues of the Substrate-Coenzyme Complex to Tyrosine Aminotransferase
C. Borri Voltattorni, A. Orlacchio, A. Giartosio, F. Conti, and C. Turano

161 Biosynthesis of Cyclopentenyl Fatty Acids. Chain Elongation and Desaturation
F. Spener

169 Structural Studies of Histidine Decarboxylase from *Micrococcus* sp. n.
V. Prozorovski and H. Jörnvall

175 Translation of Semliki-Forest-Virus Intracellular 26-S RNA. Characterisation of the Products Synthesized *in vitro*
C. Clegg and I. Kennedy

185 Étude d'une glycoprotéine salivaire humaine précipitable par les ions calcium
*(Study of a Human Glycoprotein of Which Precipitation May Be Induced by Calcium Ions)*
A. Belcourt

193 Kinetic Discrimination between Two Types of Enzyme Mechanism. Application to Lactose Synthetase
A. D. Tsopanakis and D. G. Herries

197 Proton-Magnetic-Resonance Study of the Solution Conformation of the α and β Anomers of 5-Ethyl-2′-deoxyuridine
M. Remin, I. Ekiel, and D. Shugar

207 Modification of Arginyl Residues in Porcine Carboxypeptidase B
M. M. Werber, M. Moldovan, and M. Sokolovsky

217 Activation of Nuclear RNA Polymerase by Sarkosyl
M. H. Green, J. Buss, and P. Gariglio

227 Evaluation of the Protein Components of Citrate Lyase from *Klebsiella aerogenes*
P. Dimroth and H. Eggerer

237 Primary Structures of the α-Crystallin A Chains of Seven Mammalian Species
W. W. de Jong, F. J. van der Ouderaa, M. Versteeg, G. Groenewoud, J. W. van Amselvoort, and H. Bloemendal

243 Conformational Studies of Ovine Lutropin (Luteinizing Hormone) and Its Native and Chemically Modified Subunits by Circular Dichroism and Ultraviolet Absorption Spectroscopy
J. Garnier, J.-C. Pernollet, C. Tertrin-Clary, R. Salesse, M. Castaing, M. Barnavon, P. de la Llosa, and M. Jutisz

255 Substrate Stereochemistry of the Hydroxymethylglutaryl-CoA Lyase and Methylglutaconyl-CoA Hydratase Reactions
B. Messner, H. Eggerer, J. W. Cornforth, and R. Mallaby

265 Interaction of Basic Polypeptides with Phospholipid Vesicles: Conformational Study
D. Bach, K. Rosenheck, and I. R. Miller

271 Regulation of Transcription during Sporulation of *Bacillus cereus* T. DNA-Dependent RNA Polymerase from Vegetative and Sporulating Cells
B. Rexer, V. R. Srinivasan, and W. Zillig

283 The Reconstitution of *Escherichia coli* DNA-Dependent RNA Polymerase from Its Isolated Subunits
P. Palm, A. Heil, D. Boyd, B. Grampp, and W. Zillig

293 DNA-Dependent RNA Polymerase C. Occurence and Localization in Various Animal Cells
K. H. Seifart and B. J. Benecke

301 Evidences for a Sulfhydryl Group in the ATP-Binding Site of $(Na^+ + K^+)$-Activated ATPase
R. Patzelt-Wenczler, H. Pauls, E. Erdmann, and W. Schoner

313 Binding of Thiostrepton to the Ribosomes of *Escherichia coli:* Characterization and Stoichiometry of Binding
J. H. Highland, G. A. Howard, and J. Gordon

319 Relationship between Steroids and Pyridine Nucleotides in the Oxido-Reduction Catalyzed by the 17β-Hydroxysteroid Dehydrogenase Purified from the Porcine Testicular Microsomal Fraction
H. Inano and B. Tamaoki

327 Inactivation of Glyoxalase I from Porcine Erythrocytes and Yeast by Amino-Group Reagents
B. Mannervik, E. Marmstål, K. Ekwall, and B. Górna-Hall

335 The Effect of Dietary Rape-Seed Oil on Cholesterol-Ester Metabolism and Cholesterol-Ester-Hydrolase Activity in the Rat Adrenal
G. J. Beckett and G. S. Boyd

343 Structure and Synthesis of a Lipid-Containing Bacteriophage. The Molecular Weight and Other Physical Properties of Bacteriophage PM 2
R. D. Camerini-Otero and R. M. Franklin

349 Control of Pyrimidine Biosynthesis in the Perfused Liver. Feedback Inhibition of Glutamine-Dependent Carbamoyl Phosphate Synthetase
J. Pausch, J. Wilkening, J. Nowack, and K. Decker

357 Characterization of an Inducible Amidase from *Pseudomonas acidovorans* AE 1
J. Alt, E. Heymann, and K. Krisch

371 Structure and Function of the Genome of Coliphage T5. Transcription *in vitro* of the "Nicked" and "Nick-Free" $T5^+$ DNA
K.-W. Knopf and H. Bujard

387 Proton-Magnetic-Resonance Spectroscopic Study of the Histidine Residues of Bovine α-Lactalbumin
J. H. Bradbury and R. S. Norton

397 A Prediction of the Structure of Tobacco-Mosaic-Virus Protein
A. C. H. Durham and P. J. G. Butler

405 Deuterium Transfer from [1,1-$^2$H] Ethanol during Metabolism of Bile Acids and Cyclohexanone in the Isolated Perfused Rat Liver
T. Cronholm, H. Eriksson, S. Matern, and J. Sjövall

411 Effect of Glutamate on the Control of Fatty-Acid Synthesis in White Adipose Tissue of the Rat. Inhibition of Pyruvate Dehydrogenase
W. M. Taylor and M. L. Halperin

419 Glucose Catabolite Repression in *Escherichia coli* K12 Mutants Defective in Methyl-α-D-Glucoside Transport
G. I. Bourd, R. S. Erlagaeva, T. N. Bolshakova, and V. N. Gershanovitch

429 Isotopic Hydrogen Exchange in Reactions Catalysed by Cysteine Lyase and Serine Sulphhydrase
E. A. Tolosa, R. N. Maslova, E. V. Goryachenkova, I. H. Willhardt, and A. E. Braunstein

437 On the Mechanism of Malonyl-CoA-Independent Fatty-Acid Synthesis. Characterization of the Mitochondrial Chain-Elongating System of Rat Liver and Pig-Kidney Cortex
W. Hinsch and W. Seubert

449 The Conformation of the RNA in Cowpea Chlorotic Mottle Virus: Dye-Binding Studies
K. W. Adolph

457 The Two Human Trypsinogens. Inhibition Spectra of the Two Human Trypsins Derived from Their Purified Zymogens
C. Figarella, G. A. Negri, and O. Guy

465 Content, Synthesis and Degradation of Acetyl-Coenzyme A Carboxylase in the Liver of Growing Chicks
H. Teraoka and S. Numa

471 Globin mRNA Translation on *Artemia salina* Ribosomes with Components from Friend Leukemia Cells
G. A. Kramer, P. Pinphanichakarn, D. Konecki, and B. A. Hardesty

481 Preparation of Analogues of ATP, ADP and AMP Suitable for Binding to Matrices and the Enzymic Interconversion of ATP and ADP in Solid Phase
M. Lindberg and K. Mosbach

487 Modification of Phenylalanyl-tRNA Synthetase from Baker's Yeast by Proteolytic Cleavage and Properties of the Trypsin-Modified Enzyme
F. Fasiolo, Y. Boulanger, and J.-P. Ebel

493 Aminoacyl-tRNA Synthetases from *Bacillus stearothermophilus* Asymmetry of Substrate Binding to Tyrosyl-tRNA Synthetase
H. R. Bosshardt, G. L. E. Koch, and B. S. Hartley

499 Characterization of the Reaction of GDP-Mannose with Dolichol Phosphate in Liver Membranes
D. A. Vessey and D. Zakim

505 The I Antigen of Human Red Cell Membrane
W. Ebert, D. Roelcke, and H. Weicker

517 Determination of the Activation Energy for Pseudorotation of the Furanose Ring in Nucleosides by $^{13}C$ Nuclear-Magnetic-Resonance Relaxation
O. Röder, H.-D. Lüdemann, and E. von Goldammer

525 Replicating Mitochondrial DNA from Human, Monkey and Mouse Cells. The Superhelix Density of the Closed-Circular Parental Strands
H. H. Porcher and J. Koch

533 Nuclease Digestion of Synthetase·tRNA Complexes
W. Hörz, D. Meyer, and H. G. Zachau

541 Modulation of the Activity of Insulin-Dependent Enzymes of Lipogenesis by Glucocorticoids
S. Diamant and E. Shafrir

547 Studies on Bacteriophage M13 DNA. 1. A Cleavage Map of the M13 Genome
C. A. van den Hondel and J. G. G. Schoenmakers

559 Studies on Bacteriophage M13 DNA. 2. The Gene Order of the M13 Genome
C. A. van den Hondel, A. Weijers, R. N. H. Konings, and J. G. G. Schoenmakers

569 Iodoglucagon. Preparation and Characterization
B. Desbuquois

581 Intermediates of the γ-Glutamyl Cycle in Mouse Tissues. Influence of Administration of Amino Acids on Pyrrolidone Carboxylate and γ-Glutamyl Amino Acids
M. Orlowski and S. Wilk

591 Characterization of the Reaction between Ferrocytochrome *c* and Cytochrome *c* Oxidase
L.-E. Andréasson

599 The Effect of tRNA Derivatives Bound with Natural or Synthetic mRNA on the Interaction of *Escherichia coli* Ribosomes with Colicin E3
Y. Kaufmann and A. Zamir

605 Comparative Effect of Heparin on RNA Synthesis of Isolated Rat-Liver Nucleoli and Purified RNA Polymerase A
A. Ferencz and K. H. Seifart

615 Immunological Comparison of Basic Encephalitogen and Histone F2A1
M. Bustin, D. Teitelbaum, and C. Webb
